William:

The bank records back up what we have told the FEC in the response to the RFAI. I'm not inclined to provide them to someone who first filed a complaint, and then raced to contact the media about it, rather than asking us about the issue first. It looks to me like you are more interested in publicity than fairness.

It's up to you if you want to continue to move forward with the complaint. If so, the FEC will end up publicly confirming both that the records back up our response, and also that you didn't do your due diligence properly and weren't aware that the issue had already been addressed before you filed the complaint. Your call.
